WHAT TO WEAR ON YOUR FIRST RIDE

For your first Can-Am On-Road ride, the golden rule is safety first, adapting your gear to protect against weather, road debris or more. You should wear a DOT/ECE-certified helmet, a CE certified riding jacket with protection, long pants, full-fingered gloves and sturdy, closed footwear.

Safety Tip: Ensure your protective gear is certified for the highest safety standards – this reduces the risk of injury during impact.

CE AND SAS-TEC

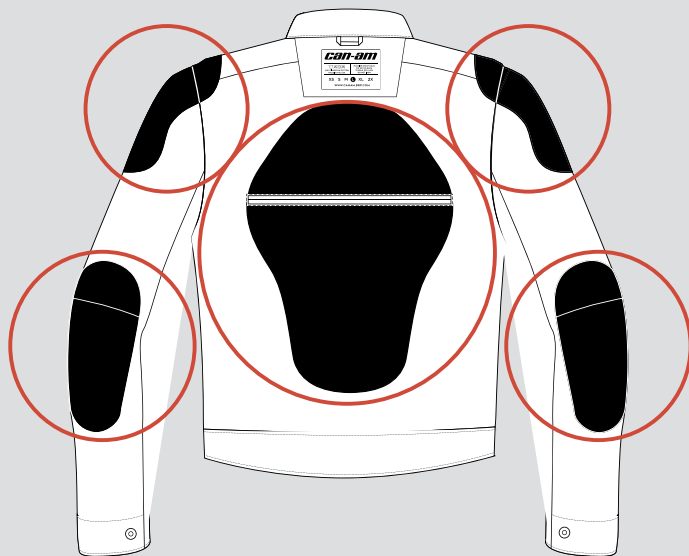

CE CERTIFICATIONS

Let's face it, getting riding gear and equipment that will protect you on the road can be complex. With a wide variety of different laws, certifications, and rating systems, it can all become very confusing very fast.

However, you can ride assured when you see the CE symbol on your Can-Am gear. These products have gone through significant testing and meet the stringent requirements necessary to earn this certification.

All of our CE certified items have passed the following tests: impact abrasion resistance, tear strength, seam strength, wash testing, and chemical testing.

So when you see the CE mark on your Can-Am gear, you can ride with peace of mind knowing your equipment has you covered.

SAS-TEC PROTECTORS

Our riding jackets include removable SAS-TEC protectors in the shoulders and elbows, as well as a zone for a back protector (sold separately). SAS-TEC protectors are low-profile, modular and, most importantly, highly effective shock absorbers.
