## NO SHORTCUTS

Like the modest champion sitting in the corner listening as others spit their egos all over each other, SCOTT quietly lets its achievements, its victories, its skills speak for themselves. We don't make products for those who yearn to be noticed. We make them for those who are going to do what they do whether there's anyone watching or not.

If you're like us, you say what you say, do what you do, ride where you ride because you love it. You do it the right way. You do it for the right reasons.

WFS

## THE NO. 1 CHOICE FOR CHALLENGING CONDITIONS

When it comes to racing on wet or muddy tracks, the Prospect WFS goggle is the only real choice. The race-proven, precision-engineered WFS50 system combined with the massive field of vision leaves all other goggles scrambling for second place.

### CLICK-ON CANISTER

No need for tools, no need to waste time; simply click the canisters onto the WORKS pins and ride. The red lever makes sure the canister is safely attached. This system is the ultimate in WORKS technology.

### LARGE 50 MM FILM

The SCOTT WFS50 is the largest film on the market, measuring a massive 50 millimeters. Combined with a thin frame construction, it offers up to 50 clear views even in the most challenging conditions.

### ANTI-STICK GRID AND TRANSPARENT MUDFLAP

A large film requires an optimized anti-stick grid with mudflap. A thin vertical line has been added in the middle of the grid to make sure the film never sticks to the lens.

The SCOTT Prospect WFS Goggle is the perfect solution for racing in wet and muddy conditions. It comes equipped with a WFS50 roll-off system for a large and clear field of vision when the mud starts spraying. The canisters can be clipped directly on the WORKS lens pins for quick and easy installation, with no tools required. Tear-offs can then be easily installed on the same pins for extra vision protection. The transparent anti-stick grid offers a superior field of vision, smooth sliding on the lens and a better sealing with the lens at the top.

SAND DUST  
LIGHT SENSITIVE

DESIGNED TO DEFEND YOUR VISION FROM THE SMALLEST  
GRAINS OF SAND

In the desert or on the beach, the Prospect Sand Dust LS is constructed with a specifically engineered foam that ensures the sand stays out of your eyes. Paired with a Light Sensitive lens which adapts to sunlight intensity, this is the ultimate goggle for all sand-based riding.

#### SMALL PARTICLE VENT FOAM MEMBRANE

To avoid any sand or dust-sized particles getting into the frame, all SCOTT Sand Dust goggles are mounted with a closed cell membrane instead of the traditional open cell vent foam. This technology guarantees perfect isolation from the elements.

#### LIGHT SENSITIVE LENS CAT. 1-2

SCOTT Light Sensitive lenses engage photochromic technology and adapt automatically to sunlight intensity. These lenses react to light changes and within seconds the lens will darken when the brightness gets stronger or lighten when the sunlight gets weaker.

#### LENS LOCK SYSTEM

With this feature SCOTT guarantees the safest lens retention on the market. It features 4 locking pins that go through the lens keeping the lens in no matter what.

The SCOTT Prospect Sand Dust Light Sensitive Goggle has been specifically designed for use on beaches, in deserts and out in the dunes. The already exceptional features of the Prospect goggle are paired with the revolutionary Dust Catcher foam. Ride freely without worrying about even the smallest dust or sand particles getting inside your goggles. ## MOTO LENS GUIDE

With a whole host of different lens options available in our range, this lens guide is designed to help make sure your vision is always the best it can be, by understanding which lenses work best in different light conditions.

### S0 - 2 / S1 - 2 : ONE LENS FOR EVERY LIGHT CONDITION

#### VISIBLE LIGHT TRANSMISSION

**SINGLE LENS: S0-2 / 28-86% | DOUBLE LENS: S1-2 / 26-76%**

### CAT.S1 / CAT.S2 / CAT.S4 : OPTIMIZING CONTRAST AND CLARITY

**SINGLE LENS: CAT.S1 | CAT.S2 | CAT.S4**

### S0 : DARK / OVERCAST

**VISIBLE LIGHT TRANSMISSION – 80%-100%**

### S1 : MIXED / WHITE CLOUD

**VISIBLE LIGHT TRANSMISSION – 43%-80%**

### S2 : BRIGHT SUNSHINE

**VISIBLE LIGHT TRANSMISSION - 18%-43%**

SCOTT'S OFF-ROAD INJECTED MOLDED AMPLIFIER LENSES UTILIZE A UNIQUE LIGHT TRANSMISSION CURVE TO OPTIMIZE CONTRAST AND OPTICAL CLARITY.

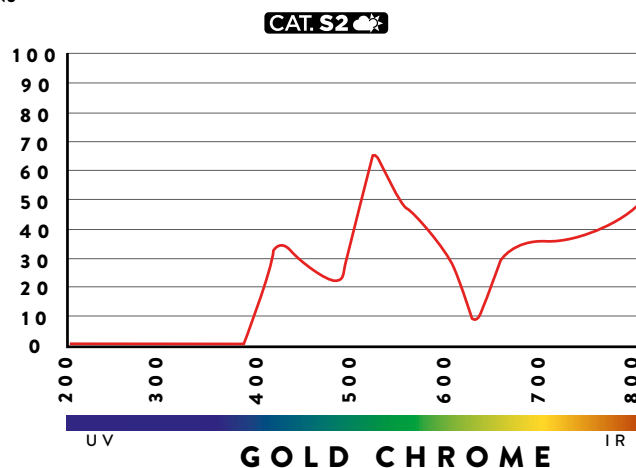

## WHAT IS CONTRAST?

The SCOTT Amplifier tint is designed to let through some specific colors to your eye while filtering out others, in order to create a high contrast within the terrain you are looking at.

## HOW DOES THE EYE PERCEIVE CONTRAST?

Through years of research we have learnt that our eyes are better at perceiving certain wavelengths than others. The eye can be thought of as the lens of a camera. There are parts and mechanisms inside the eye that control the vital role in our ability to see things in focus, color, darkness and brightness. By controlling what is let through the Amplifier lens, we can control how the external environment is perceived.

SCOTT AMPLIFIER TECHNOLOGY IS AVAILABLE IN TWO OFF-ROAD LENS OPTIONS

## CONTRAST AMPLIFIED

SCOTT sets the industry standard for contrast enhancing optics with its patented amplifier lens technology. The secret to amplifier technology is its ability to add contrast while increasing clarity and definition in all racing conditions.

## MAIN BENEFITS

- Allows you to see contours, ruts and transitions in the dirt in ultra-high-definition
- Works for both motocross and enduro
- Builds speed and confidence through improved visual clarity

# SCOTT LIGHT SENSITIVE LENSES

## ONE LENS FOR EVERY LIGHT CONDITION

SCOTT's Light Sensitive lenses engage photo-chromic technology and adapt automatically to sunlight intensity to give you ultimate vision on the track regardless of the light conditions. These lenses automatically react to light changes and within seconds the lens will either darken when the brightness gets stronger or lighten when the sunlight gets weaker. This means going from bright sun into sudden shade has never been easier.

# SCOTT WORKS LENSES

---

SCOTT'S INNOVATIVE WORKS LENSES SET OUR GOGGLES APART FROM THE REST.

Featuring SCOTT's historic technology, the WORKS lens enables the rider to use the same lens for both tear-offs and roll-offs. With these do-it-all lenses, you can be fully prepared for whatever the weather might throw at you. Thanks to the factory-installed WORKS pins, SCOTT roll-off systems or tear-offs can be easily and quickly mounted and removed depending on the race profile and track conditions.

## 4 - PIN WORKS LENSES

---

For the larger lens on the SCOTT Prospect and Fury goggles, the 4 pins provide more stability for the tear-offs and the WFS50. With this system the accessories will always remain tight to the lens and provide the rider with a better vision.

# AIRFLEX PROTECTION WITH D3O® TECHNOLOGY

## THE NEW PROTECTION STANDARD

### THE SAFER PROTECTION

SCOTT AirFlex protection excels with a SCOTT exclusive D3O® design that protects what matters. Improved protection along the spine with extended support in the crucial lumbar area reduces the risk of injuries by absorbing any type of impact. All of our protection is certified according to current European standards – EN 1621-2. We are proud to offer protection that goes beyond this standard and elevates your safety by covering more of your crucial body parts.

### VENTILATION. MAXIMUM AIRFLOW

Gone are the times when back protectors were adding heat. With strategically placed air vents, AirFlex controls body temperature by allowing maximum airflow. Keep your body at the right temperature in every moment.

### COMFORT THROUGH FLEXIBILITY

Performing at your best requires maximum freedom of movement. While protecting against any energy impact, AirFlex is light and follows your every movement. Soft as a marshmallow, but hard as a diamond in the event of an impact, AirFlex with D3O® feels like a second skin that adapts to your body.

## TECHNOLOGY

### D3O® IMPACT PROTECTION TECHNOLOGY

D3O® is a unique material that focuses on energy dispersion in critical areas for maximum shock absorption and protection. The functionality of the raw material originates from the synergetic effects of the polymer-based dilatant. Energy is distributed throughout the synthetic elastomeric polymer and the enhanced chemistry continues to disperse the energy throughout the matrix, significantly reducing the effect of impact.

### SHOCK ABSORPTION

Unique technology that focuses on energy absorption and protection.

### LIGHT & FLEXIBLE

Provides maximum comfort and protection at the same time.

### CE CERTIFIED

Integrated D3O® protectors allow for highest levels of safety according to CE EN 1621.

## LEVEL 1 & LEVEL 2 PROTECTION

### STANDARD PROTECTION AREA

As required by standard  
EN 1621-2:2014

### SCOTT EXTENDED LUMBAR SUPPORT

SCOTT AirFlex offers a further lumbar support with D3O® technology.

## PROTECTION BEYOND STANDARDS

### EXTENDED LUMBAR SUPPORT

For improved protection of your back and spine with extended support in the crucial lumbar area. We are proud to offer protection that goes beyond the "Standard" and elevates your safety by covering more of your crucial body parts.

### CERTIFICATION

All our protectors are certified according to current European standards - EN 1621-2:2014.

### AIRFLEX – LEVEL 1 PROTECTION

Withstands 5kg impacts with no more than 18kN of force transmitted.

**PERFECT FOR:** Versatile riders who seek a lightweight protector.

### AIRFLEX PRO – LEVEL 2 PROTECTION

Withstands 5kg impacts with no more than 9kN of force transmitted. Level 2 protection offers twice the protection of Level 1.

**PERFECT FOR:** Riders in exposed terrain seeking maximum protection.

## LEVEL 2 OFFERS TWICE THE PROTECTION OF LEVEL 1

The en 1621-2 test drops a 5kg weight on our protector from a 1m height. By measuring the residual force, we design a protector to be Level 1 or Level 2.

Level 2 protection offers twice the protection of Level 1

A close-up photograph of a blue athletic jersey, likely a cycling jersey, featuring a white crew neck collar. The jersey has a large, bold, yellow 'SCOTT' logo with a black outline, slanted diagonally across the chest. The fabric appears to be a technical, mesh-like material. In the bottom right corner, a portion of another garment with a white background and blue polka dots is visible.

## HELMET TECHNOLOGIES

For radial impact we have introduced Conehead Technology to our helmets. It is a unique construction that has two different densities of EPS. This increases the impact absorption of the helmet.

**Mips**

To protect the brain from rotational violence we have introduced the revolutionary MIPS brain protection system. MIPS is a low friction layer inside the helmet which allows the head to rotate relative to the helmet in an angled impact. This substantially reduces rotational violence and the potential for damage to the brain.

## SCOTT SPUR MULTI-LENS CASE SUNGLASSES

266004

The SCOTT Spur Multi-Lens Case Sunglasses represent a step further in performance eyewear. The innovative design, with its XL lens creating a perfect shield, is largely focused on protection. The low-profile branches are specifically designed to fit well with helmets, offering added coverage over the temples for optimal comfort. Additionally, the SCOTT Spur features the ELC system, which allows you to switch lenses quickly and easily. The Spur comes with three lenses: a clear one for riding at night or in bad weather, a red chrome Amplifier that enhances contrast in low light and a grey lens that blocks high-intensity rays, thereby reducing eye fatigue on sunny days. These sunglasses also have an adjustable nose piece, and come with a sport multi-lens case and microfiber bag for convenient storage.

# ELECTRONIC DATA INTERCHANGE

## WHAT IS EDI – ELECTRONIC DATA INTERCHANGE

Improve your business efficiency and simplify work with SCOTT's electronic data interchange (EDI) SOLUTION. EDI is a solution for computer-to-computer exchange of business documents in a standard electronic format between business partners.

These business documents cover a wide range of options from placing an order, fulfilling the product database with prices, EAN code, product descriptions, or even exchanging electronic invoices, and in some contexts, optionally exchanging stock level information.

## TRADITIONAL INFORMATION EXCHANGE

### SCOTT EDI SOLUTIONS HELP YOU TO BECOME MORE EFFICIENT

By proceeding with IT connection between our Business Software and your Business Software, both yourself, your collaborators and SCOTT's employees

- ✓ **Avoid manual operations**
- ✓ **Save employees time**
- ✓ **Avoid human error**
- ✓ **Simplify business documents and information exchange**

## WITH EDI AUTOMATIC EXCHANGE

## WHO CAN BENEFIT FROM OUR SCOTT EDI SOLUTIONS?

EDI is an electronic format that every business can use, so long as both partners have Business Software compatible with EDI solution.

If you are unsure, contact your IT service provider and ask!

## HOW MUCH DOES EDI INTEGRATION COST?

SCOTT offers a range of EDI integration solutions in different data formats. We do not charge anything for the service of integrating with your EDI-ready solution.

The only cost for you would be the cost of enabling EDI capability on your Business software, with your habitual IT service provider.

## WHAT EDI SOLUTIONS DOES SCOTT OFFER AND HOW COULD I BENEFIT FROM THE SERVICE?

### STEP #1

Check with your IT provider if you can handle EDI integration, and what it would cost for you.

To make the process smoother you can share the technical documentation delivered here:

[WWW.SCOTT-SPORTS.COM/EDI](http://WWW.SCOTT-SPORTS.COM/EDI)

### STEP #2

If your IT Provider confirms your ability to benefit from EDI integration, please contact your usual SCOTT Sales Representative or SCOTT Customer Service, they will deliver all the necessary information for organizing the next steps.
