

APACHE 360 TRACK SYSTEM

by ALLEN BERNAIS

APACHE 360. THE BEST YEAR-ROUND TRACK SYSTEM. **PERIOD.**

Can-Ams Apache 360 is everything a track system should be; in fact it's what other track systems would love to be. Track systems add a powerful versatility to your machine, giving you the confidence and control you need, when and where you need it. Best of all, it's designed specifically to allow Can-Am vehicles to perform more, perform better and do it in all 4 seasons!

CHOICE

Choosing a track system comes down to more than sticker price. Many factors come into play that determine its real cost over the lifetime of your machine. You can measure it in real dollars, or in the added enjoyment you get out of your ride. If you're looking for hassle-free easy driving and superior reliability, Can-Am tracks systems are made to go the distance.

CONTROL

Can-Ams Apache 360 and Apache 360 LT are a complete rethink of the track, inside and out. For starters, we didn't skimp on the track guides, in fact they're molded in, greatly reducing the chance of detracking and 5 sets of wheels pump up the contact and traction, offering less resistance, and better flotation. Front lug design is optimized for superior handling, easy steering, and produces a lot less vibration, so even the longest ride won't wear you out! Our innovative rear track achieves the perfect balance between too much, and too little grip, so terrain never slows your get-up-and-go!

CONVENIENCE

If the Apache Track System were only measured by its practicality it'd still come out on top. Our super-simple access lets you switch it out in 20 minutes, and a simple tweak to the track wheel adjusts tension. Better still, it's the only track system that lets you change the track attack angle from hard packed to deep snow in 5 minutes, which is almost as fast as the weather changes in some parts!

COST

Consider our exclusive DPS Module. Connecting to your vehicle's onboard computer it serves to increase and improve power steering and response while automatically correcting for discrepancies in speedometer and odometer readings that are common in track systems. It's a difference that can add up to 40% more odometer mileage than actually covered, impacting your vehicle's resale value and complicating scheduled maintenance!

Can-Ams warranty closes the deal by covering the Apache Track System with a one-year warranty, or even the same warranty as your vehicle if purchased at the same time! It only makes sense: Can-Am builds the vehicle and the track and certifies them as an integrated system, which means you get a ride that gives you it all in winter, spring, summer, or fall.

Choosing the right track system has never been easier, and the right track system has never been better than Can-Am Apache 360. Built by riders, designed without compromise.

BIGGEST CONTACT PATCH TO PROVIDE EXTRA FLOTATION AS WELL AS TRACTION

APACHE 360 TRACK SYSTEM

- Best year-round kit on the market.
- Biggest contact patch, highest ground clearance and lowest steering effort.
- Quick conversion from tires to tracks in less than 20 minutes for fastest switch.
- Reduced friction and vibration with heightened rubber over mold wheels.
- Track design and rubber for more traction in snow or any other type of ground surface.
- Apache 360 Mounting kit required (sold separately).

Outlander & Outlander MAX (except with 400 engine), Renegade 2013 and up 500 engine, Renegade 2012 and up 800 and 1000 engine
715001981

APACHE 360 LT TRACK SYSTEM

- Developed from the same technology that makes our Apache 360 Track System the best year-round track system.
- Able to tackle the toughest year-round conditions, this new system has two settings the user can choose to for a better attack angle or greater flotation.
- Heavy-duty components ensure reliability and the design offers excellent acceleration, turning, braking and side-hilling performance.
- Highest ground clearance on the market: 1 extra inch.
- Larger contact patch by 15 in² at front and 41 in² at the back.
- Conversion from tires to track in only 20 minutes.

Outlander and Outlander MAX 2013 and up (except with 400 engine), Outlander and Renegade 2012 with 800R or 1000 engine

CVT PRE-FILTER

- Designed to prevent snow intrusion in the CVT and belt slippage when Apache 360 Track System is used in deep snow.
- Easy to install and remove.
- Standard on Renegade and Outlander 800R 2009.

Renegade & Outlander 2012 and prior with 500 engine, Renegade & Outlander 2009 and prior with 600 engine, Renegade & Outlander 2008 and prior with 800R engine
715000552

CVT AIR INTAKE

- Designed to relocate and maximize height of the CVT air intake to prevent belt slippage in deep snow or muddy conditions.
- Equipped with integrated CVT pre-filter to also reduce dust and extend CVT and belt life.

Outlander 500, 650, 800R 2008-2009
